Education

Aug 2024 – Jun 2026 Systemutveckling i Java och JavaScript, Lernia

Systems development with a focus on full-stack development in Java and JavaScript.

Work & Projects

May 2025 – Jun 2025 Wordle clone, School project

I developed a Wordle clone using React for the frontend, EJS templates for server-side rendering, and MongoDB for data storage in the backend.

Oct 2025 – Jan 2026 Portfolio, Personal project

I built a personal portfolio website in Next.js 15 to showcase my projects and skills, developed with modern web technologies and deployed on Vercel.

Oct 2025 – Nov 2025 Spring Boot REST API, School project

I built a book management REST API using Spring Boot 3, Java 25, and MySQL 9. Implemented Spring Data JPA, Docker Compose for database setup, Flyway migrations, Spring Security with Basic Authentication, and a Thymeleaf view. Covered with MockMvc tests for endpoints and authentication.

Nov 2025 – Jan 2026 Washify, Thesis project

I developed a full-stack booking system for mobile car washing services. Built with Next.js 15, TypeScript, and Supabase, the application handles user authentication, booking management, and real-time data storage.

Feb 2026 – May 2026 Webbkompagniet, LIA

I developed an artist booking website using WordPress with the Frost FSE theme. The project involved building custom Gutenberg blocks, Custom Post Types, Advanced Custom Fields (ACF), and Ninja Forms, along with a custom AJAX-powered search filter.

May 2026 – Jun 2026 Svea Byggpartner AB, Client Project

I built a professional company website for a handcraft and carpentry business using Next.js 15, Tailwind CSS, and Framer Motion. The site features smooth animations, a lightbox for project showcasing, and contact functionality for job inquiries.

Experience & Skills

Programming languages: Java, JavaScript, TypeScript, C#

Frontend: React, Next.js, Bootstrap, Tailwind CSS

Backend & Frameworks: Spring Boot, .NET, Node.js

Databases: MySQL, MongoDB, Supabase

Tools & Other: Linux, Docker, Scrum, Maven, JUnit and Git/GitHub.

Language

Arabic: native.

Swedish: fluent.

English: fluent.

Portuguese: beginner level
